

# Course Overview

## A62 Crane Supervisor

**Number of Candidates: 1 – 4**

**Course Duration: 2 days**

**Course Outcome: CPCS Red Card**

### Introduction

This course is designed for managers and supervisors who are responsible for supervising lifting operations in a construction environment. Experiences signallers who are looking to become crane supervisors may also attend this course.

### Aims & Objectives

The course will inform delegates how to undertake the duties of a crane supervisor as instructed by the appointed person. Delegates will learn how to safely supervise a lift while complying with current regulations, legislation and codes of practice. Delegates will be advised of the necessary managerial and practical consideration in supervising lifting operations and will be given the opportunity to put this information into practice during simulated exercise in the training room. On completion of the course delegates will have sufficient knowledge and information to safely supervise lifting operations for mobile cranes on a busy construction site.

### Course Delivery

This course involves a high proportion of hands-on demonstrations and practical exercises, supplemented with classroom-based tutorials and pre course assessments.

### Location

All course take place at ITS PLANT TECH

### Certification

Successful candidates will achieve a Red CPCS Trained Operator Card valid for two years. During this two-year period candidates will need to achieve a L4 NVQ Diploma in Controlling Lifting Operations – Supervising Lifts. This will enable delegates to upgrade their red card to a blue CPCS competent card.

### COURSE PROGRAMME

The CPCS Crane Supervisor course covers the following:

- **Legislation, regulations and codes of practice relating to lifting duties**
- **Safe systems of work (including risk assessments and method statements)**
- **Personal responsibility**
- **The role of crane supervisors and appointed persons**
- **Crane appreciation including types of cranes and common terms**
- **Crane documentation, stability, duty charts and safety devices**
- **British Standard 7121**
- **Preparing and area with exclusion zones**
- **Planning a lift**
